PENTOSIN – product variety in motion

PENTOSIN products are known worldwide for excellent quality. Our broad range of products is subject to permanent change. We only know one direction: moving on! In the continuous process of change we constantly extend our assortment with innovative high-tech products in close cooperation with our partners.

Our range of products consists of:

- brake fluids
- central hydraulic fluids
- gear oils and ATFs
- engine oils
- shock absorber oils
- coolants
- various specialities for automotive and industry sector

PENTOSIN – product range highlights

Highlights of our broad product range include:

for the power steering:

our central hydraulic fluids PENTOSIN CHF 11S and PENTOSIN CHF 202

for the brakes:

for example our low viscosity brake fluid PENTOSIN DOT 4 LV, meeting the latest technical requirements

for the brake system:

our brake fluid filling and bleeding device PENTOTROLLY® 2

for the gear:

for example our series of double clutch gear oils with life time performance (FFL-2/3/4) supporting the latest market developments around double clutch gears

for the engine:

for example our PENTO SUPER PERFORMANCE III 5W-30, meeting the requirements of long term changing intervals as contribution

for the driving comfort:

our shock absorber oils

PENTOSIN Quality

Quality products and QS at the highest stage:

- Exclusive use of high-quality raw materials, supplied by producers and trading companies who are not only QS certified, but also have top values in the supplier scoring
- Comprehensive control system as well as continuous quality and lab analyses during the entire production process
- Certifications according to ISO/TS 16949:2002, ISO 14001:2004 and ISO/IEC 17025:2005
- Numerous international quality appraisals, awards (e.g. Ford-Q1 Preferred Quality, VW-Formula Q-2000) and customer evaluations
